

---

**Asghar Zaidi** is a Senior Economist at the Social Policy Division, OECD, Paris and he is also Director Research at the European Centre for Social Welfare Policy and Research in Vienna. At OECD, he is working on issues related to pension policy in OECD countries. In the past, he worked as an Economic Advisor at the Department for Work and Pensions of the United Kingdom, and as a Researcher at the Social Policy Department of the London School of Economics and University of Oxford. His work interests include economics of ageing (particularly pension reforms and their impact on retirement incomes), implications of living costs of disability on poverty and resource measurement, and dynamic microsimulation modelling (in particular those used for pension trends and their underlying factors). He is currently the Vice-President of the International Microsimulation Association, and also the co-editor of the forthcoming book “New Frontiers in Microsimulation Modelling” (jointly with Ann Harding and Paul Williamson). He has also co-edited a book “Mainstreaming Ageing. Indicators to Monitor Sustainable Policies” (jointly with Bernd Marin). He is a Research Affiliate at the German Economic Research Institute (DIW Berlin) and at the Centre for the Analysis of Social Exclusion, London School of Economics, London.
