Selected research projects

Euromod

Euromod is a tax-benefit micro simulation model for the European Union (EU) that enables researchers and policy analysts to calculate, in a comparable manner, the effects of taxes and benefits on household incomes and work incentives for the population of each country and for the EU as a whole.

Funded by the European Commission, DG Employment, Social Affairs and Inclusion
Year: 2009 – 2015 (involved since 2011)

Activities performed: Austrian National Team member, annual update of policy parameters and input data, validation of the Austrian model.

Austromod

Austromod is a web application based on Euromod. The aim is to develop a tool for the staff of ministries but also for the broader public to analyse the social impact of new drafts of acts and regulations.

Funded by the Austrian Ministry of Labour, Social Affairs and Consumer Protection
Year: 2012 – (open end)

Activities performed: Development of the Austrian specific micro simulation model, providing support for the development of the web application, validation of the model, update of the input data, support in specifying the model and questions.

European Observatory on the Social Situation

The project monitors and provides annual reports on trends in income distribution and social inclusion regarding income and wealth, the impact of tax-benefit systems, the access to services, questions related to poverty, and population groups particularly at risk of exclusion in the Member States of the European Union.

Funded by the European Commission, DG Employment, Social Affairs and Inclusion
Year: 2005 – 2013 (involved since 2010)

Activities performed: annual update of the website and analysis of the data on at-risk-of-poverty and social exclusion.
