# New Frontiers in Microsimulation Modelling

Edited by **Asghar Zaidi**, European Centre for Social Welfare Policy and Research, Austria and OECD, France, **Ann Harding**, University of Canberra, Australia and **Paul Williamson**, University of Liverpool, UK

In the past fifteen years, microsimulation models have become firmly established as vital tools for analysis of the distributional impact of changes in governmental programmes. With contributions from more than 60 international experts, this volume offers a comprehensive introduction to the state of microsimulation internationally, illustrating a wide range of new applications and approaches.
