Institutional Responses
to Drug Demand in
Central Europe

An Analysis of Institutional
Developments in the Czech Republic,
Hungary, Poland and Slovenia

European Centre Vienna
Ashgate
Understanding the crucial link between institutional contexts and drug problems is germane to the process of developing appropriate drug policies and drug demand reduction strategies. However, this link is too often taken for granted. Still most drug-related research has relied primarily on epidemiological, bio-medical or clinical approaches, ignoring the social contexts in which drug use finds its causes and where its consequences are most visible and hardest felt. No countries than the states of Central and Eastern Europe demonstrate better that the drug problem is a social problem and that its causes emerge from a broad array of social factors. The social perspective is considered essential for the development of effective drug policies and demand reduction strategies.

This publication analyses in both a country-oriented and comparative manner the main features of institutional settings towards the drug problem. Research carried out in the Czech Republic, Hungary, Poland and Slovenia has shown that changed policy perceptions and attitudes towards drugs and related problems have had a considerable impact on the tasks, which different institutions had to confront. The establishment of new organisations, particularly of a non-governmental nature, as well as the growing importance of networks reflect the changed institutional environment, needed to effectively counteract drug-related problems. It might still be too early to evaluate whether these changes have had a positive effect on the drug situation in these countries. However, the research results demonstrate undoubtedly the need to continue to place the social contexts in which drug use takes place at the heart of research. Without this, it will be impossible to develop effective institutional responses towards one of the most important problems we presently are confronted with.

*Patrick Kenis* is Professor at the Department of Policy and Organization Studies of the University of Tilburg, the Netherlands, and External Research Associate to the European Centre for Social Welfare Policy and Research, Vienna. *Flip Maas* is Programme Co-ordinator of the Health and Welfare Department at the European Centre for Social Welfare Policy and Research, Vienna. *Robert Sobiech* works as a Researcher at the Department of Social Policy of the University of Warsaw and at the National School of Public Administration, Warsaw, Poland.

Contents

Preface 7

Chapter 1
Drug Demand Reduction in Central European Countries: Analysing the Institutional and Organizational Responses
Patrick Kenis 11

PART I: COUNTRY STUDIES 25

Chapter 2
The Drug Problem in the Czech Republic In Search of an Institutional Structure
Ladislav Csémy / František David Krch 27

Chapter 3
Drug Demand Reduction in Hungary The Two Worlds of Prevalence and Perception
Zsuzsanna Elekes / Tünde Györy 91

Chapter 4
Institutional Responses to Drug Problems in Poland On the Crossroad
Robert Sobiech / Joanna Zamecka 137

Chapter 5
The Institutional Response to Drug-Related Problems in Slovenia Balancing between Harm Reduction and Abstinence Approaches
Bojan Dekleva / Renata Cvelbar Bek 205
PART II: COMPARATIVE ANALYSES

Chapter 6
What Are the Interrelationships between Drug Problems and Drug Policy
Lessons from the Analyses of the Institutional Context
Ladislav Csémy / Zsuzsanna Elekes

Chapter 7
The Perception of the Drug Problem and Opinions on National Policies
Can We Think beyond Borders?
Tünde Györy / Robert Sobiech

Chapter 8
The Division of Labour between NGOs and Governmental Organizations
Renata Cvelbar Bek / František David Krč

Chapter 9
Are the Differences in Attitudes Towards Drugs Related to Different Demand Reduction Structures and Services?
Bojan Dekleva / Joanna Zamecka

Chapter 10
Networks in Drug Demand Reduction Policy and Practice
Patrick Kenis / Stefan Loos
